

TPMS-203

For vehicles with more than 6 wheels

Application:

Digitire TPMS-203 for vehicles with more than 6 wheels is a tire pressure monitoring system designed for:

- * Medium and heavy duty trucks
- * Trucks with trailers
- * Specialty vehicles

Features:

- * The system includes high pressure sensors, an integrated receiver and display, and antennas.
- * Digitire TPMS provides continuous monitoring for up to 32 wheels.
- * Maximum pressure: 14Bar (200PSI)
- * Fits all wheel combination (14"~22.5") with easy installation and retro-fit.
- * Allows user to customize default cold inflation pressure.
- * Warnings for low pressure, high pressure, high temperature and leakage

steel strap and cradle are used for sensor retention
